Audio Spec

All microphones & DI boxes are to be provided by the venue, unless explicitly stated otherwise in advance. We will also require all XLR cables & drum mic clamps.

Guitars // Vox (Theo):

- Fender Champion 100 watt amp
- DI input into desk (XLR straight from pedal board)
- Vocal microphone
- IEMs & wireless IEM kit

Bass (Toby):

- House bass amp
- DI input into desk (unless previously stated) (XLR straight from pedal board)
- DI input for sub bass tone (XLR straight from pedal board)
- Vocal microphone

Drums (Rhys):

- House Drum Kit (unless previously stated)
- Snare and Cymbal Breakables
- Mapex Drum Throne
- Vocal microphone

Wendigo currently plays with 1 wireless IEM kit (for lead vox/guitar) - onstage monitoring will be done by onstage wedges for bass & drums, with each member requiring minimum 1 wedge.

Lighting

Wendigo are not gigging with our own Lighting Engineer. Please provide an experienced, sober Lighting Technician for our performance. We're happy to provide a setlist with some notes.

The show is a high energy grunge gig, and lighting should reflect this, happy for your tech/s to have fun with the show.

Backdrop

Our first choice is always to use our backdrop. Please provide a back truss bar that we are able to hang this off that can be lowered in during changeover.

Backdrop fire certification: TBC

Please advise if there is a video wall at the show that we are able to make use of, and provide resolution & dimension, as well as what format you'd like to mgmt@wendigo.uk
